CONTENTS

No. 1, JULY, 1944

The Bacterial Oxidation of Corn Oil. J. O. Mundt and F. W. Fabian 1
Sugar and Salt Tolerance of *Clostridium pasteurianum* and Some Related Anaerobes. C. H. Spiegelberg 13
A Chemical and Immunological Study of the Capsular Polysaccharide of *Clostridium perfringens*. Muriel Harden Svec and Elizabeth McCoy 31
Experiments on the Transmission of an Icterogenic Agent in Yellow Fever Vaccine to Horses and Swine. B. N. Carle, W. H. Dewhirst, Jr., W. Braun, and M. D. Eaton 45
Citric Acid Fermentation by Streptococci and Lactobacilli. J. J. R. Campbell and I. C. Gunsalus 71
Carbonic Anhydrase. III. Effect on Growth of the Type I Pneumococcus, *in Vitro*. Edna R. Main and Arthur Locke 77
Some Artifacts Encountered in Stained Preparations of Tubercle Bacilli. I. Non-Acid-fast Forms Arising from Mechanical Treatment. Diran Yegian and Keith R. Porter 83
The Influence of Sulfanilamide upon the Yellow Pigment Formed by *Mycobacterium tuberculosis* from p-Aminobenzoic Acid. Rudolf L. Mayer 93
Microbiological Aspects of Riboflavin. III. Oxidation Studies with *Pseudomonas riboflavina*. Jackson W. Foster 97
Notes
The Isolation of Streptococci from Mixed Cultures. George H. Chapman 113
The Flagellation of *Listeria monocytogenes*. A. M. Griffin and Mary Louise Robbins 114
Fermentation by Streptothricin-resistant Cultures of *Aerobacillus polymyxa*. David Perlman 116
The Growth Factor Requirements of Certain Streptococci. Lemuel D. Wright and Helen R. Skeggs 117
Proceedings of Local Branches of the Society of American Bacteriologists 119

No. 2, AUGUST, 1944

The Significance of Pleomorphism in *Bacteroides* Strains. L. Dienes and William E. Smith 125
The Lecithinase Activity of *Vibrio comma* and the El Tor Vibrio. Oscar Felsenfeld 155
Aerobic Decomposition of Guayule Shrub (*Parthenium argentatum* Gray). Joseph Naghski, Jonathan W. White, Jr., and Sam R. Hoover 159
The Preparation of a Polyvalent Dysentery Bacteriophage in a Dry and Stable Form. II. Factors Affecting the Stabilization of Dysentery Bacteriophage during Lyophilization. Arthur L. Schade and Leona Caroline 179
Tyrosine Decarboxylation by Streptococci: Growth Requirements for Active Cell Production. W. D. Bellamy and I. C. Gunsalus 191
Substitution of Thymine for "Folic Acid" in the Nutrition of Lactic Acid Bacteria. J. L. Stokes 201
Slime-producing Coliform and Coliform-like Bacteria. J. R. Sanborn 211
The Production of Carotenoid Pigments from Mineral Oil by Bacteria. H. F. Haas and L. D. Bushnell 219
In Vitro Action of Sulfonamides on Clostridia. Sulfonamide Inhibitors. G. B. Reed, J. H. Orr, and R. W. Reed 233
The Preparation of a Polyvalent Dysentery Bacteriophage in a Dry and Stable Form. III. Stability of the Dried Bacteriophage Towards Heat, Humidity, Age and Acidity. Arthur L. Schade and Leona Caroline 243

Notes
Effects of Penicillin on Streptococcal Fibrinolysis. Erwin Neter and Dessie W. Will. 253
Proceedings of Local Branches of the Society of American Bacteriologists. 255

No. 3, September, 1944

Studies on Hemolytic Streptococci. VII. Distinguishing Characters of the Lactose-negative Species of Lancefield's Groups A and C. Alice C. Evans 263
Studies on Hemolytic Streptococci. VIII. *Streptococcus equisimilis*. Alice C. Evans.. 267
Measuring the Growth of *Azotobacter*. P. L. Gainey 285
A Study of Certain Members of the Genus *Corynebacterium*. R. F. Brooks and G. J. Hucker. 295
Comparison of the Morphology of *Bacillus megatherium* with Light and Electron Microscopy. I. N. Dubin and D. G. Sharp 313
A Study of the Fungistatic and Fungicidal Properties and of the Toxicity for Mice of Sodium Azide. J. Arthur Herrick and J. Emerson Kempf 331
A Yellow Pigment Formed from p-Aminobenzoic Acid by *Mycobacterium tuberculosis* var. *hominis*. Rudolf L. Mayer. 337
Atypical Acid-fast Microorganisms. I. Nucleic Acid Fraction. Frank G. Petrik.... 347
Taxonomy of the Family *Enterobacteriaceae*. Earle K. Borman, C. A. Stuart and Kenneth M. Wheeler. 351
Distribution of Influenza Virus Type A in Infected Eggs and the Survival of Virus under Certain Conditions of Storage. Harold E. Pearson. 369
Proceedings of Local Branches of the Society of American Bacteriologists 379

No. 4, October, 1944

Studies on Some Growth Factors of Yeasts. Paul R. Burkholder, Ilda McVeigh, and Dorothy Moyer. 385
Mode of Action of Penicillin. I. Bacterial Growth and Penicillin Activity—*Staphylococcus aureus* FDA. S. W. Lee, E. J. Foley, and Jeanne A. Epstein 393
Mutation or Variation of *Escherichia coli* with Respect to Growth Requirements. Raymond R. Roepke, Raymond L. Libby, and Margaret H. Small. 401
Starch Hydrolysis and Fermentation by the Yeast *Endomycopsis fibuliger*. Lynferd J. Wickerham, Lewis B. Lockwood, O. Glenn Pettijohn, and George E. Ward. 413
Effect of Seitz Filtration upon pH. Henry B. Webb, Oliver J. Irish, and Victor I. Lyday. 429
On the Mechanism of Bacteriostasis with Triphenylmethane Dyes. E. Fischer, Q. Hoffmann, E. Prado, and R. Boné 439
The Inactivating Effect of Monochromatic Ultraviolet Radiation on Influenza Virus. Alexander Hollaender and John W. Oliphant. 447
Diversion of the Lactic Acid Fermentation with Oxidized Substrate. I. C. Gunsalus and J. J. R. Campbell. 455
Pathogenesis of Venezuelan Equine Encephalomyelitis Virus Infections in the Developing Chick Embryo. Hilary Koprowski and Edwin H. Lennette. 463
Factors Which Influence the Growth of Heat-treated Bacteria. II. Further Studies on Media. F. E. Nelson. 473
Serum Albumin as a Food for Human Tubercle Bacilli. Dorothy M. Powelson and Janet R. McCarter. 479
Isolation and Study of Cultures of Chinese Vetch Nodule Bacteria. H. Zanyin Gaw.... 483
A Micro-Glucide Dish. R. Devignat. 491
Notes
Differentiation of *Bacillus polymyxa* and *Bacillus macerans* on the Basis of Vitamin Requirements. H. Katznelson. 495

The Role of Carbohydrates in the Development of Pigment by *Staphylococcus aureus*. M. G. Sevag and Morris N. Green 496
Sucrose Fermentation by *Shigella alkalescens*. C. A. Stuart and Robert Rustigian ... 497
Strains of *Salmonella cholerae-suis* Producing Acetylmethylcarbinol. C. A. Stuart and Robert Rustigian 498

NOV. 5, NOVEMBER, 1944

Studies on Cellulose Fermentation. I. The Culture and Physiology of an Anaerobic Cellulose-digesting Bacterium. R. E. Hungate 499
An Alcohol Oxidation System in Streptococci Which Functions without Hydrogen Peroxide Accumulation. Elizabeth C. Greisen and I. C. Gunsalus 515
Chaetomin, a New Antibiotic Substance Produced by *Chaetomium cochliodes*. I. Formation and Properties. Selman A. Waksman and Elizabeth Bugie 527
Chaetomin, a New Antibiotic Substance Produced by *Chaetomium cochliodes*. II. Isolation and Concentration. Walton B. Geiger, Jean E. Conn, and Selman A. Waksman 531
Electrokinetic Studies on *Erwinia amylovora* and *Phytomonas stewartii* in Relation to Virulence. Vernon L. Frampton and E. M. Hildebrand 537
Antibacterial Effects of Various Organic Substances upon the H37 Strain of Human Tubercle Bacilli in a Simple Synthetic Medium. W. F. Drea 547
The Reliability of Bromthymol-Blue Lactose Agar and Bacto Phenol-Red Mannitol Agar for the Isolation of Pathogenic Staphylococci. George H. Chapman 555
The Cause of Variation in the Relationship between Titratable Acidity and Hydrogen Ion Concentration among Lactic Acid Bacteria. Carl S. Pederson and Josephine V. Bagg 559
Ribonucleic Acid and the Gram Stain. J. W. Bartholomew and W. W. Umbreit 567
The Growth of Bacteria with a Constant Food Supply. I. Preliminary Observations on *Bacterium coli*. R. C. Jordan and S. E. Jacobs (With the technical assistance of A. L. Sims) 579
A Method for the Determination of Penicillin Levels in Body Fluids. Philip Rosenblatt, Erna Alture-Werber, Florence Kashdan, and Leo Loewe 599
Methods of Measuring Penicillin Concentrations in Body Fluids. William M. M. Kirby and Lowell A. Rantz 603
Notes
Recovery of Relapsing Fever Spirochetes from *Ornithodoros turicata* (Duges), 1876, in California. A. L. Burroughs and Robert Holdenried 609
Use of a "U" Tube for the Isolation of Monophasic Varieties from Diphasic Salmonella Cultures. A. A. Hajna 609
The Identification of "Streptococcus Lactis R" as a Strain of *Streptococcus faecalis*. I. C. Gunsalus, C. F. Niven, Jr., and J. M. Sherman 611
Effects of Sulfonamides and Azochloramid on Hemolytic Streptococci in Artificial Wounds of Rabbits. Thomas Lamberti, Roger S. Hubbard, and Erwin Neter 612

NO. 6, DECEMBER, 1944

The Mechanism of Resistance to Sulfonamides. I. Factors Controlling the Formation of Arylamine from Tryptophane by *Staphylococcus aureus*. M. G. Sevag and Morris N. Green 615
The Mechanism of Resistance to Sulfonamides. II. Absence of Correlation between Resistance and the Formation of Arylamine by *Staphylococcus aureus*. Noninterference with the Utilization of Glucose as a Critical Factor in the Development of Resistance to Sulfonamides. M. G. Sevag and Morris N. Green 623
The Mechanism of Resistance to Sulfonamides. III. Pantothenic Acid and Tryptophane Metabolism: The Role of Pantothenic Acid in the Synthesis of Tryptophane

by *Staphylococcus aureus* and the Effect of Vitamins on Tryptophane in Exercising Antagonism to Sulfonamides. M. G. Sevag and Morris N. Green 631
Penicillin. II. Natural Variation and Penicillin Production in *Penicillium notatum* and Allied Species. Kenneth B. Raper, Dorothy F. Alexander, and Robert D. Coghill 639
A Serological Study of Root Nodule Bacteria from Pea and Clover Inoculation Groups. A. Kleczkowski and H. G. Thornton 661
Note on the Ability of Certain Strains of *Rhizobium* from Peas and Clover to Infect Each Other's Host Plants. J. Kleczkowska, P. S. Nutman, and G. Bond 673
Studies on the Mechanism of the Inhibitory Action of Zephiran on Yeast Cells. M. G. Sevag and O. A. Ross 677
The *In Vitro* Effects of N-Substituted *p*-Aminobenzoic Acid Derivatives upon Sulfonamides. G. R. Goetchius and C. A. Lawrence 683
Respiration of Resting *Azotobacter* Cells as Affected by the Respiratory Menstruum. John O. Harris and P. L. Gainey 689
Flagellation of *Azotobacter*. Alvin W. Hofer 697
Rapid Serological Typing of Shigellae: A Preliminary Note. William H. Ewing 703
Index 705
Contents iii
